[http://www.cpus.ca.gov/PUBLISHED/COMMENT\\_DECISION/56784.htm](http://www.cpus.ca.gov/PUBLISHED/COMMENT_DECISION/56784.htm)

In the Draft Decision, the Energy Division is expected to host a workshop within 15 days of the final release of the order. (See Section 3.2.1.)

The proposed decision asks the Energy Division to work with the California Independent System Operation (CAISO) and the California Energy Commission to: (1) adjust the local capacity requirements for the local areas for which deficiencies in qualified generation capacity have been identified by the CAISO; and (2) allocate local capacity requirements to individual, Commission-jurisdictional load-serving entities (LSEs), thereby establishing each LSE's local procurement obligation, using the allocation principles adopted in the decision.

The Commission's Energy Division will prepare and release a workshop agenda prior to the meeting. In addition to the items listed above, as well as any other items directed to the Energy Division in the final order, the Energy Division expects to use the meeting to discuss the 2007 Resource Adequacy Template and Guide (which will be released prior to the workshop).

**R06-02-013** - Order Instituting Rulemaking to integrate procurement policies and consider long-term procurement plans.

**Summary: AUGMENTATION REQUIRED.** On June 28, 2006, Marc Joseph, attorney for the Coalition of California Utility Employees (CUE), participated in an all-party meeting with Pres. Peevey in San Francisco. Also present were Nancy Ryan, advisor to Pres. Peevey, and other attendees. A portion of the testimony was read. Joseph stated that in at least two prior decisions, the Commission had decided to have both utility owned and independent generation. Joseph noted that the draft decision foreclosed utility owned generation by requiring Pacific Gas and Electric Company and Southern California Edison Company to fill up all of the system need with power purchase agreements. Joseph asserted that this would result in higher costs because the independent generators would know that they had no competition from cost based generation, would force bundled customers to pay more than their fair share for any utility owned generation, and would deprive direct access customers of the best deal. Joseph noted that utility owned generation may be the best deal for customers, with Colusa being an example.

**Summary:** On June 28, 2006, Fong Wan, Vice President, Energy Procurement, Pacific Gas and Electric Company, participated in an all-party meeting with Pres. Peevey in San Francisco. Also present were Nancy Ryan, advisor to Pres. Peevey, ALJ Brown and other attendees listed on the sign-in sheet, attached to the notice. Written material (attached to the notice) was used. Wan recommended that the Commission defer all details of the energy auction to Phase 2 of the proceeding. Wan stated that the discussion in the proposed decision (PD) should be modified so that it does not prejudice the auction design or nature of the 'energy rights' to be auctioned. Wan asserted that it was important that the utilities not be required to accept bids if the bid prices and terms were not competitive or above an established reservation price. Wan urged the Commission to clarify that the investor-owned utilities (IOUs) have an opportunity to choose between the cost allocation methodology in the PD and the 10-year non-bypassable charge mechanism adopted in D04-12-048. Wan stressed that a critical aspect of the PD was the ability of the IOUs to manage the energy of new resources under the terms of the Joint Parties' proposal in the event that an energy auction is not successful.
